PEP is the most hands on, real time program I have ever undertaken. It takes into consideration our actual work environment and needs and allows us to immediately implement the ideas of PEP into our everyday working environment. This shows us that by reinforcing the ideas in program, we start using them and prevents us from shelving the course to collect dust.

PEP made us change old habits that we believed would be uncomfortable or even impossible to change.

We now work as a team with the same mind set and priorities in place to achieve the same objectives in a productive way. PEP has provided us with more assistance to work on the value proposition for the company, develop realistic ideas for customers, and provide more time for solutions.

Personally, I attended PEP to become more efficient and to make better use of the systems that we have available. The result was that I improved my efficiency and effectiveness through better time management, prioritising better, improved Outlook efficiency, use of the Task Bar and Mind Mapping.

The greatest benefit for me from the program is stress relief.

I started seeing the benefits of PEP a 1/3 of the way through the program. I now complete tasks ahead of schedule rather than avoiding them all together. I allocate more time to job priorities.

PEP is far superior to other training programs because we were able to implement what we have learnt. We were given time try out, experiment and then reinforce the information studied in the course. The coaching was the most efficient way to make it work.

I felt the presenters showed a high level of professional ability combined with their knowledge of the proven systems, which helped us take on the suggested ideas with ease, confidence and acceptance.

Yours sincerely

Bob Holloway
Business Development Manager
